Recommendations to reduce attrition

Based on IBM HR dataset analysis of 1,470 employees — actionable steps to improve workforce retention and satisfaction.

16.1%

Current attrition rate

8 – 10%

Target attrition rate

~90 employees

Estimated to retain

Key recommendations

Control overtime

High priority

- Overtime employees are 3x more likely to leave (30.5% vs 10.4%)
- Cap weekly overtime at 10 hours and enforce consistently
- Offer compensatory leave for extra hours worked
- Run quarterly workload distribution reviews

Revise compensation bands

High priority

- Sales Representatives earn \$2,626/mo — highest attrition role
- Lab Technicians are underpaid at \$3,237/mo
- Benchmark salaries against current market rates
- Define a transparent annual increment policy

Focus on early-career retention

Medium priority

- 18–25 age group has 31% attrition — highest of any cohort
- Launch structured mentorship programs for new joiners
- Communicate a clear career growth trajectory
- Increase engagement activities in the first two years

Improve work-life balance

Medium priority

- 424 employees scored 1–2 on work-life balance — at risk
- Introduce flexible working hours where roles permit
- Expand remote or hybrid work options
- Invest in wellness programs and mental health support

Projected impact if recommendations are implemented

Attrition reduction

~6%

Employee satisfaction increase
